

BAG MANUFACTURING AND PACKAGING APPARATUS

ABSTRACT OF THE DISCLOSURE

An aim is to provide a bag manufacturing and packaging apparatus which is able to conduct a bag manufacturing at high speed, further to be small in
5 height.

A bag manufacturing and packaging apparatus 1 comprises a bag manufacturing unit that includes a transverse sealing mechanism 17 and a strip mounting unit that includes a transfer mechanism 32. The bag manufacturing unit manufactures bags filled with articles. The transfer mechanism 32 transfers bags
10 manufactured by the bag manufacturing unit diagonally downward. The strip mounting unit mounts bags B to a strip S after they are transferred by means of the transfer mechanism 32.
